On September 2, 1999, Messrs. Donegan and Kavanaugh met with representatives of the Center for Drug Evaluation and Research to discuss the agency's final monograph for sunscreen drug products for over-the-counter use (64 FR 27666, May 21, 1999); and the possibility of deferring the effective date for this monograph, to allow for resolution of remaining testing and labeling issues in a revised, comprehensive final monograph for these products.
